

FOLDING DECK CRANE

Low cost, space saving by G-Lift !

G-Lift Folding Crane System is capable of lifting 350 kg to 1000 kg, sufficient for inflatable boats, jet-ski and personal watercraft. There are four different models available.

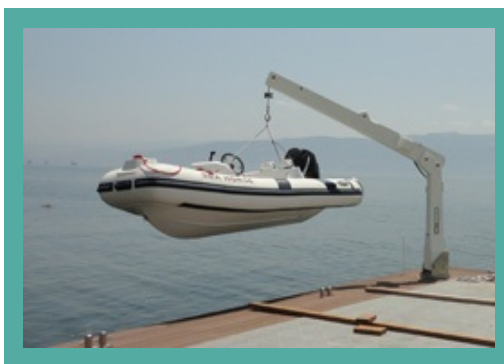

The folding design allows the maximum amount of vertical height and reach range, and maximum space-saving when in stowed position. A typical application for this crane is stowing it completely concealed in a deck locker.

G-Lift Folding Crane System folds out in 3 steps and the boom rotates manually around its axis. The crane is fitted with a Warn Electric motor (12V/24V DC) which has an automatic speed control safety system.

The G-Lift Folding Crane System is finished to the highest standards with a two stage Awl-GRIP spray paint application in any color to match your vessel

LIFT SYSTEMS

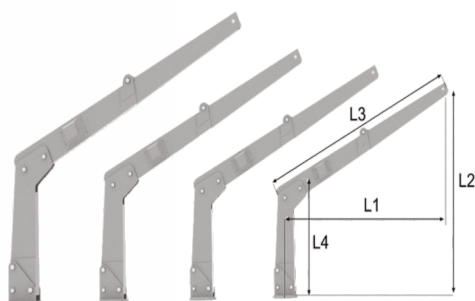

General Features

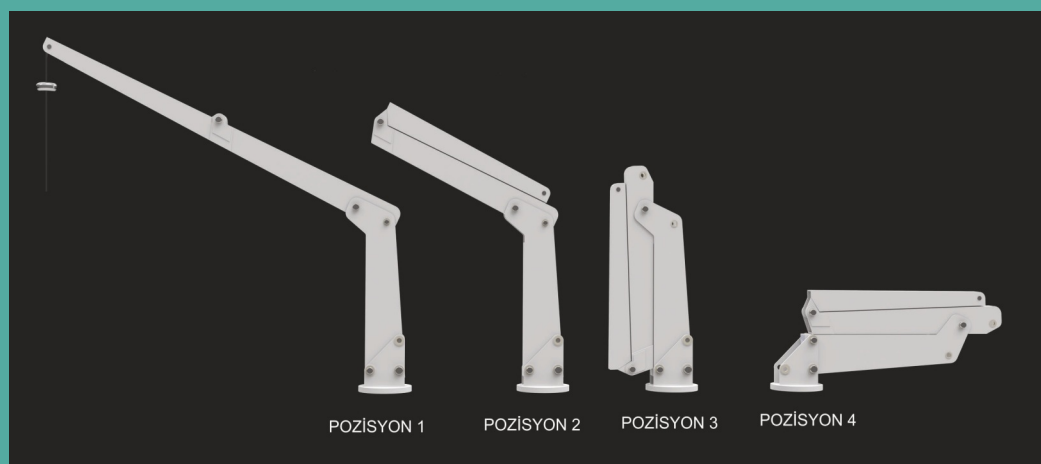

- Marine Aluminum body
- 355° turning angle
- Easy installation
- Maximum space saving
- Dyneema travel rope
- Proof tested to %125
- Electrival hoist
- 12V/24V DC Warn Electric Hoist
- Auto adjustable speed safety system
- Electric motor security locking system
- Cable remote control
- Awl-GRIP top coot
- Two year warranty

Optional Features

- Pedestal base mount
- Custom boom lenght
- Wireless remote control
